

You want to become a **Backend Developer** at ambiotex?

We are looking for a backend developer (m/f/d) for our office in Berlin-Schönefeld, who will develop backend and frontend applications that store and present our Smartshirt data for the health and safety of the wearer.

How your work will look like:

- ✓ **Develop the ambiotex cloud system**
- ✓ You will implement the backend in Java using the Spring Framework and a SQL Database
- ✓ You will develop and extend our Angular-based Frontend
- ✓ You will offer cloud services via RESTful APIs and WebSocket
- ✓ You test and deploy the applications that you develop in the CI/CD environment GitLab

What we expect from you:

- ✓ An applicant who is enthusiastic about technology and who has already gained initial experience Spring and Angular.
- ✓ You like to take on responsibility, organize projects and communicate in German and English.
- ✓ You identify with our products and want to make the lives of our customers better, healthier and safer.

You have already developed backend/frontend applications with Java and Angular. Additionally, you have already collected first experience with Frameworks like Spring and Hibernate. You are keen to improve your skills and like to work in an exciting company.

Do you recognize yourself? Then apply now at ambiotex. We digitize security. If you like to share this passion with us, we look forward to hearing from you and to meeting you personally.

Become our Backend Developer:

Apply to our CEO Christian Seidl by mail: career@ambiotex.com.
